Dear Examiner:

There was a previous patent application for the invention that is the subject of this patent application. The specification contained flaws that couldn't be overcome. That original application received a "final action".

The application number for the file was 08/408919. The file is still in existence I believe. Please incorporate the original file into my current application wrapper.

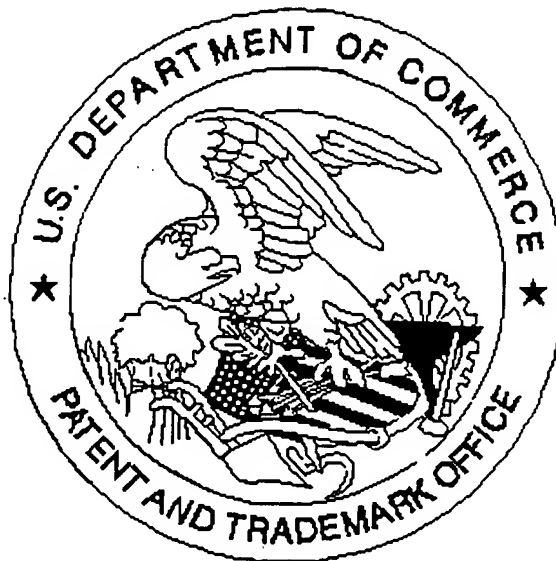

Very Respectfully
Virgil Olson

P.S. My computer just quit working so I am having to hand write this letter
